

BRAMA XS CONTROLLER FOR EDUCATION

The Brama XS Controller supplies educational organizations with the means to easily protect internal data. Also, through the optional Captive Portal the Brama XS Controller makes it very easy for support personnel to provision new users and devices.

Students and teachers are increasingly using mobile devices; they might not only use laptops, but also bring a mobile phone and/or tablet computer. The Brama XS Controller makes it easy to distinguish between these devices and provides a unified way to connect these devices to applications, services and the Internet.
